

How To Become A Pediatric Dentist

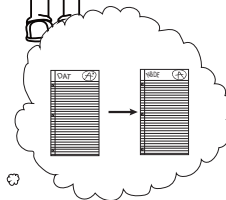

FIRST:

Study hard!
You must graduate highschool
with a GPA of 3.5 so that you
get into a good college!

NEXT:

Make your way to college!
Here you will study lots of
sciences and math, as well
as foreign language,
bio-chemistry, physics,
and calculus.

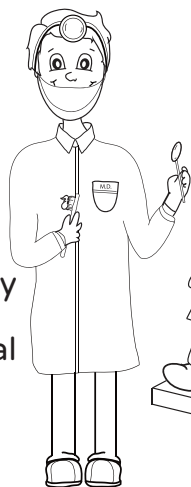

THEN:

Before applying
to get into a
great dental
school you
must pass the DAT
(Dental Admissions Test).
Once you pass the
DAT, you complete
4 years of dental
school!

FINALLY:

After taking the NBDE
exam (National Board
Dental Exam) you'll apply
for a residency where
you spend two additional
years learning dentistry
training on kids!

Did you know?

Pediatric dentists got their start studying lots of science and math! Remember to keep your grades up, so that you can become anything you dream to be!
