

The Importance of Brushing Your Teeth Experiment

Materials Needed:

- 2 Eggs
- 2 Glasses filled halfway with grape soda
- A toothbrush and toothpaste
- A pot of water

Step 1: Have an adult hardboil two eggs for you

Step 2: While your eggs boil, squeeze some toothpaste on a toothbrush

Step 3: Once your eggs have cooled, apply a thick coat of toothpaste to one egg. Leave the other egg as it is, without any toothpaste.

Step 4: Put one egg in each cup of grape soda. Leave the eggs in the cups overnight.

What happened? How did the outcome differ for the egg with toothpaste from the egg without toothpaste? It is especially important to brush your teeth everyday to keep them healthy, and, prevent staining from your food.
